

# ***Nurse and Midwife Medicinal Product Prescribing Toolkit***

## **Sample Audit Tool**

June 2020

*Changing practice to support service delivery*

This sample audit tool can be used by registered nurse /midwife prescribers (RN/MP) to audit their prescribing practice using the Nursing and Midwifery Board of Ireland (NMBI) *Practice Standards and Guidelines for Nurses and Midwives with Prescriptive Authority* (NMBI, 2019).

## Methodology

<b>Population:</b>	RN/MP prescription and associated documentation
<b>Sampling:</b>	Ten prescriptions and associated documents should be selected or more if required
<b>Frequency of Audit:</b>	As determined by health service providers audit process for prescribing practice and medicine management
<b>Method:</b>	This is a retrospective audit

## Part 1: Demographic Details

Name of RN/MP: NMBI PIN:	
Work Address:	
Area of Practice:	
Date of Audit:	
Audit Planning Timeline:	Quarterly <input type="checkbox"/> 6 monthly <input type="checkbox"/> Annually <input type="checkbox"/> Post incident <input type="checkbox"/> If other please state _____
Audited by:	Signed by:

## Part 2: Audit Tool

Answer Yes / No / N/A	1	2	3	4	5	6	7	8	9	10	Total	%
<b>Patient Assessment:</b>												
1. Physical examination												
2. Present/previous history (including medications)												
3. Relevant clinical details (examinations and investigations)												
4. Medication interactions & contraindications												
5. Medication Allergies												
6. Rationale for the prescribing decision												
<b>Prescription Writing Must:</b>												
7. Be legible												
8. Have the correct name of the medicinal product												
9. Have the correct dose of the medicinal product												
10. Have the correct route of the medicinal product												
11. Have the correct frequency of the medicinal product												
12. State the name of the RN/MP including their signature (as per NMBI)												
13. State the NMBI PIN(Personal Identification Number)												
14. Use indelible ink including computer generated prescriptions												
15. Be dated												
16. State full name of the patient/service user												
17. State the address of the patient/service user												
18. State the date of birth where the patient/service user is under the age of 12 years												
<b>Medication Appropriateness:</b>												
19. Is the medicinal product appropriate for the condition												
20. Is there unnecessary duplication with other medicinal products												
21. Is a relevant follow-up plan recorded												

Signature of Auditor (s): \_\_\_\_\_

Date of Audit: \_\_\_\_\_

## Part 3: Audit Tool for Prescription Writing for MDA Schedule 8 Medicinal Products

Answer Yes / No / N/A	1	2	3	4	5	6	7	8	9	10	Total	%
<b>The Prescription must Specify in the RN/MP Prescriber's Handwriting:</b>												
22. Is the prescription handwritten												
23. The name of the controlled drug to be prescribed												
24. Is the dose of the controlled drug to be taken by the person for whose treatment the prescription is issued												
<b>In the case of a Prescription for a Controlled Drug which is a Preparation the RN/MP must include:</b>												
25. The form and, where appropriate, the strength of the controlled drug to be supplied												
26. Either the total quantity (in both words and figures) of the preparation or the number (in both words and figures) of dosage units, as appropriate, to be supplied												
27. In the case of a prescription for a controlled drug which is not a preparation, the total quantity (in both words and figures) of the controlled drug to be supplied												
28. In the case of a prescription for a total quantity to be dispensed in instalments, the number of instalments and the intervals at which instalments may be dispensed.												

Signature of Auditor (s): \_\_\_\_\_

Date of Audit: \_\_\_\_\_

## Calculation of Compliance Rate Percentage

The audit tool calculates the score for the audit. The score, expressed as a percentage, is calculated by dividing the number of “yes” answers by the total of “yes” and “no” answers. “Not applicable” answers are excluded from the calculation of the percentage score.

### Example:

If there are 18 “yes” and 2 “no” answers, the score is calculated as follows:

18 (yes answers) divided by 20 (total of yes and no answers) multiplied by 100.

The score in this example would be **90%**.
